***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 13-17, drawn to a database for storing label records and data, classified in class 707, subclass 100.
  - II. Claims 7-12, drawn to storage of label records and data without use of a database, classified in class 711, subclass 1.
  - III. Claims 18-23, drawn to a method for storing label records with an interface for setting status of said records, classified 715, subclass 700.
  - IV. Claims 24-30, 48-56 drawn to label management system and method for storing configuration data 705., subclass 500.
  - V. Claims 31-40 drawn to a database for the storing, archiving and printing label records, classified in class 707, subclass 204.
  - VI. Claims 41-44, drawn to a label template defining fields for data, classified in class 715, subclass 500.
  - VII. Claims 45-57 drawn to a label management system with database and template design tools, classified in class 707, subclass 100.
  - VIII. Claims 57-60, drawn to a label management system with central storage and remote access for printing classified in class 707, subclass 10.
2. The inventions are distinct, each from the other because of the following reasons:
3. All inventions are related as different methods and different apparatuses for their practice. The inventions are distinct if it can be shown that either: (1) the methods as claimed can be practiced by another materially different apparatus or by hand, or (2) the

Art Unit: 3621

apparatuses as claimed could be used to practice materially different processes. (MPEP § 806.05(e)). In this case, each of the different methods as claimed can be practiced at least partially by hand.

4. Because all of these inventions are distinct and because the search required for any one Group is not necessarily required for any other Group, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
